

Kashy Diary Codebook

Campbell, L., Simpson, J. A., Boldry, J. G., & Kashy, D. A. (2005). Perceptions of conflict and support in romantic relationships: The role of attachment anxiety. *Journal of Personality and Social Psychology*, 88, 510-531.

103 Dating Couples completing a 14-day daily diary study

The file is pairwise person-period dataset.

Couple-Level Variables

DYADID the identification variable for each couple

Respondent Variables

Gender Actor's gender: -1 Female; 1 Male
Person Gender: 1 = Male; 2 = Female
GenderS Actor's (person's) gender as string variable: "Woman"; "Man"
CAavoid Attachment Avoidance based on the average of the 8 avoidance items from the AAQ, scores can range from 1 to 7 where higher scores indicate higher levels of avoidance. Grand-mean centered across individual with a mean of 3.2627.

Partner Variables

CPavoid Grand mean centered attachment avoidance of the Partner.

Variables Measured at Multiple Time Points

Day Day of the study 1-14
Time Centered variable based on day of the study. Range -6.5 to 6.5
AConflict Each day, participants reported on how often they had experienced conflict or other negative events with their partner on a 7-point scale (1 = none, 7 = many).
AConflictC Grand mean centered value for AConflict
ASATISF Each, participants reported on how satisfied they felt with their relationship and how close they felt to their partner on *that day* on 7-point sales (anchored 1 = not at all, 7 = extremely). Scores from the two measures were averaged for each day to create a measure of daily relationship satisfaction.
PConflict Partner's conflict on a particular day
PConflictC Grand mean centered value for Partner's conflict
PSATISF Partner's satisfaction on a particular day

Created Variables

Man 1 = Man; 0 = Woman
Woman 1 = Woman; 0 = Man
